## PERSONAL STATEMENT

---

I am an experienced, motivated, and reliable software engineer with a passion for creating great products and leading teams, working in a very Agile focused way, practising Scrum, TDD, BDD etc. and any technology that helps me keep ahead of the game. I am interested in developing Web applications, especially in JavaScript - EcmaScript(5,6) technologies(AngularJS, ReactJS, NodeJS). In the nearest future I will focus on functional programming paradigm in Scala, Clojure. Available from february/march 2015.

## SKILLS

---

**Programming:** JavaScript, Java, Scala, L<sup>A</sup>T<sub>E</sub>X, HTML/CSS(3.0)

**Software development process:** Agile, Pair programming, TDD, BDD

**Interested:** Scala, Clojure, Docker

**Selected Technologies:** AngularJs, Lo-Dash, NodeJs, jQuery, React, Git, SVN, JUnit, Jasmine, Mocha, GruntJs, Glup, Gradle, Spring, Ruby on Rails, Sass, Less

**Tools:** Emacs, Jira

**Databases:** Redis, MySQL, PostgreSQL, MongoDB

**Os:** Windows; Linux(Arch Linux)

## CAREER HISTORY

---

**Orbit Developer, Capita Employee Benefits**

*July 2014 - Present*

As a lead AngularJs Expert i'm working on new front-end single page application (SPA), build automation and CI enviroment for UI part. Creating core reference app for other new projects in company also common ui library. Knowledge sharing sessions, presentations, pair programming.

*Technologies:* Agile, TDD, EcmaScript(5,6), AngularJs, Lo-Dash, GruntJs, Sass, NodeJS, Jasmine, Mocha, Selenium webdriver, Java, Spring, Tomcat, Redis, ActiveMQ, Gradle

**Software Engineer, Owner, Effective Code**

*July 2012 - Present*

Working on SPA and hybrid mobile application development

*Technologies:* Agile, TDD, EcmaScript(5,6), AngulaJs, Cordova, React, Immutable-js, Mori, Gulp, GruntJs, Sass, NodeJS, Mocha, Selenium webdriver, Scala.

**Software Engineer, PGS Software**

*July 2012 - June 2014*

**- Refresh Java web legacy system**

*2013-01 - 2014-06*

As a Software Engineer, I was working on new front-end for legacy J2EE project- remove old JSP server compile pages and transfer to new HTML5 client compile UI, main tasks were: development and lead front-end team, unit and e2e testing, architectural decisions and creating documentation.

*Technologies:* J2EE, Java SE 1.6, Junit, SVN, GIT, Hibernate, EcmaScript5 - JavaScript, AngularJS, NodeJS, GruntJs, Jasmine, UndrescoreJS, Jenkins, Emacs, Agile, TDD.

**- Apartment finder - startup**

*2012-07 - 2012-12*

As a Software Engineer, I was working on new features for legacy IN (Intelligent Network) platform, main tasks were: development, unit testing, integration testing and creating documentation.

*Technologies:* JEE, Java SE 1.6, Junit, SVN, Spring, Hibernate, PostgreSQL, Postgis, Eclipse, Maven, Jenkins, Agile, TDD, EcmaScript5 -JavaScript, BackboneJS, AngularJS.

**Software Engineer - Contract/Remote, Synergia Pro***August 2013 - October 2013*

As a Java J2EE/ Front End Consultant, I was working on a team developing and maintaining web based application, writing code and automated tests( frontend and backend ) for client from USA(Texas).

*Technologies:* Agile, TDD, Maven, Java 1.6/1.7, Eclipse RAP 2.0, JavaScript, ExtJS, NodeJS, Jasmine, Selenium webdriver.

**Software Engineer, Tieto Poland***June 2010 - June 2012***- Charge@Once-Intelligent Networks - Nokia Siemens Network Wroclaw** *2012-01 - 2012-06*

My main tasks were: development, unit testing, maintenance and creating documentation of Service Control Points stateful and stateless components. Project was set in the international environment: I collaborated with developers and testers from other countries (Germany, India, etc.).

*Technologies:* Agile, TDD, Java, JUnit, Spock, ClearCase, Linux, GIT

**- IN (Intelligent Networks) v7.5 - T-mobile Berlin / Tieto Germany** *2010-12 - 2011-12*

As a Software Engineer, I was working on new features for legacy IN platform, main tasks were: development, unit testing, integration testing and creating documentation.

*Technologies:* Agile, Java SE 1.5, Junit, Clear Case, XML, Flex Logic (NSN), Ruby/Bash

**- Application Server v2.0 - Nokia Siemens Network Wroclaw** *2010-06 - 2010-11*

Implementation of Java-based Application Server(platform) for communication with and managing of underlaying Intelligent Network environment. AS is build on top of JAIN SLEE 1.1 standard and its OpenCloud implementation - Rhino platform. My main tasks were: development, unit testing, maintenance and creating documentation.

*Technologies:* Agile, Java SE 1.6, SVN, Hudson/Sonar, Maven/Ant, CMD/Perl/Bash scripts, XML, Agile.
